DRINK ME

By Alex

The cycle of subcultures begins with opposition; as a group they go against the grain of mainstream culture (McLuhan, 1974:148) which they believe presents and obscures signs that do not correspond to their own identities. They communicate through commodities by undermining their original intentions and create new ones which align with the subculture, what at the same time possibly thanks to the various systems that the original commodities belonged to. "non-conformism had turned from something vague and diffuse into a posited political and cultural position, which [combats] the principle of fashion" (Friedrichson, 2004:97).

The fact that this has been opposed through the use of stylish innovations is, in most cases, what attracts the media's attention and the emergence of a particular subculture is inevitably accompanied by a phase of hysteria, a typically ambivalent if fluctuating between shock and fascination, outrage and amusement" (McLuhan, 1974:148).
