## granny's attic.

This collection encompasses a maximalist, bold, kitsch, and playful feeling. **It focuses on nostalgia, taking inspiration from photographs of my Grannies**, – ranging from the 1960's up to the early 2000's (where I am also included in some of the photos), and objects that I associate with my Grannies, like **quilts or ceramic ornaments**. **The collection's look is akin to a child going into their granny's attic and playing dress up**. To encompass the playful and maximalist feel, the collection utilises bright colours, and combines them in a bold and clashing way.

The aim for the final collection is to have a **mismatched and layered aesthetic**, full of **unusual juxtapositions between fabrics, prints, and colours**. With **oversized silhouettes and layering, and the use of gathers and frills** – referencing the **childlike aesthetic of playing dress-up**. There is also a focus on the home-made approach to **craft** – as if a garment had been made for a child by their granny, but then made adult size. **This collection aims to be made up of quality garments that maintain longevity and can be cherished and worn time and time again** – without too heavily referencing trend.
